## **Carrier Access and Carrier Selection Code Allocations.**

### **1. Introduction.**

In July 1998, the Office of the Director of Telecommunications Regulation (the ODTR) issued the decision notice D1/98 on carrier access and carrier selection. This notice outlined methods by which carrier access and carrier selection codes may be used to access telecommunications services providers other than Telecom Eireann by using the Telecom Eireann telephone network. Also indicated were the proposed conditions and procedures for application and allocation of the codes.

The purpose of this document is to report the results of the application process to date.

### **2. Application / Allocation Procedures and Conditions.**

The application and allocation procedure developed for use in the 'start-up period' can be found in annex 5 of decision notice D1/98.

Allocations were initially made under the current telecommunication services licences<sup>1</sup>. A new licensing framework is currently being developed, and will be implemented before the end of 1998. At that time, a new form of licence may replace the existing licences, and licensees who receive an appropriate new-form licence will be permitted to use previously allocated codes, subject to the new licensing conditions.

Initially, the ODTR will not charge for carrier access allocations. However this position will be reviewed in the future.

### **3. Reserved Carrier Access and Carrier Selection Codes.**
