Communications Regulation

Media Release - 22 December 2005

Contract for the format of the Proposed Irish Postcode System awarded

This contract was awarded on behalf of the National Postcode Project Management Board (NPPMB) which was established by Minister Noel Dempsey to represent stakeholders in May 2005.

This contract will see Version 1 Software deliver a technical specification agreed by the NPPMB for a public postcode system in Ireland.

Evidence from other countries demonstrates that the use of postcodes can contribute to competitiveness and national development. The introduction of an efficient, effective and publicly usable postcode system will provide an essential piece of infrastructure to sustain and support economic growth in Ireland.
