Deferral of revised radio links fee structure as outlined in ComReg 03/124

Document No:	05/52
Date:	8 July 2005

Deferral of revised radio links fee structure as outlined in ComReg 03/124

ComReg has decided to defer the introduction of the revised fee structure for fixed radio links as outlined in ComReg Document 03/124. The revised fee structure was the subject of a consultation in 2003 and was due to be introduced from the 1st July 2005 onwards.

This deferral is as a result of ComReg's decision to issue a new consultation document reviewing fees for a broad range of radio services later this month. The new consultation document will include a review of fees for a number of radio licences including - business radio, all radio links, marine radio, aeronautical radio, paging and experimenters.
