Call for input on Industry trends for ComReg Strategy Statement

Document No:	09/90
Date:	01, December, 2009

Call for input on Industry trends for ComReg Strategy Statement

ComReg has initiated a review of its strategy for the period 2010 to 2012 and is seeking stakeholder input into the development of a strategy statement. The process is in its initial phase, which involves the gathering and analysis of information that will inform the review.

At a later stage in the process ComReg will consult on a draft Strategy Statement with a view to publishing a revised strategy statement in 2010. At this stage, ComReg is seeking input specifically in relation to the environmental, technology and market trends affecting the communications industry and regulation over the next three years. The objective of this phase of analysis is to ascertain the major market influences, which ultimately affect the shape of the industry and end user demands and requirements.

Interested parties are invited to send a written submission by way of responding to this call for input by 22 December 2009. The feedback received will assist in formulating the strategy. Alternatively, ComReg would welcome meeting with interested parties during this period.

This call for input is specifically in relation to the factors outlined above and interested parties will have an opportunity to comment on ComReg's draft Strategy Statement when it is issued.

The due date for comments is Tuesday 22 December 2009 at 5.30 pm.

Comments should be submitted to:-
