1. Introduction

In June 2002, the Commission issued a Decision Notice on *eircom's* Reference Interconnection Offer-D10/02. It directed *eircom* to implement the capability for Near End Hand Over within three months.

The Commission proposes to set the rates listed in appendix 1 below as interim rates from 1 October 2004 to 31 December 2004. These rates are based on information supplied to ComReg by *eircom*. Some of the information relating to the level of bad debt applicable to individual products may be subject to revision as more accurate data becomes available.

These rates apply to ESAT-BT which is the only operator to have implemented Near End Hand Over (NEHO) of NTC calls with *eircom*. The prices for this service comprise the conveyance costs related to the specific points of interconnection and average call holding times of that operator.

The existing industry average rates continue to apply to other operators that have not requested NEHO and continue to collect calls at the Tertiary Switches. These rates apply only to calls originated by *eircom* and do not apply to transit traffic to this Operator.
