1 Quarterly Key Data Report Information Notice

The ComReg Quarterly Key Data Report relies on the data provided by companies operating in the electronic communications sector in Ireland. In compiling the most recent report (June 2006, ComReg document 06/28), incorrect data supplied by certain operators was used, resulting in an error in relation to Figure 3.2.2. This Figure relates to the breakdown of mobile market share data by revenue, and it should not be relied on. In line with ComReg's normal policy, an explanation of the issues that arose and the appropriate adjustments will be published in the next edition of the Quarterly Key Data Report in September.
