I am pleased to present the eighth edition of the Radio Frequency Plan for Ireland. Radio frequency spectrum (“Spectrum”) is a finite but essential natural resource contributing €4.7 billion to Ireland’s Gross Domestic Product (GDP). The Commission for Communications Regulation (ComReg) is tasked with managing increasingly complex requirements for Spectrum, in order to support key industries and stakeholders such as: those in the Broadcasting, Defence Forces, Education, Emergency Services, Telecommunications and Transport sectors, to name but a few. There has also been a massive increase in the consumption of data by mobile users since the advent of the smartphone, exceeding 500% since 2012, which has been facilitated by improvements in 3G and new 4G network rollouts. The use of wireless devices, such as smartphones and tablets in facilitating wireless broadband access to the internet is now an important dimension, in meeting the demands of many users. Furthermore, developments such as the Internet of Things (IoT), smart metering and the forthcoming 5G mobile networks are also supported by Spectrum. Indeed ComReg’s Test and Trial Ireland (<http://testandtrial.ie/>) in facilitating research into many of these applications.

This latest edition also details several significant amendments that were introduced at the World Radiocommunication Conference of the ITU in 2015 (WRC-15) and includes all of the required updates on national and European legislation, together with the applicable CEPT Decisions and Recommendations are included.

The provision of clear, complete and accurate information on Spectrum is therefore, essential for all stakeholders. Moreover, section 35 of the Communications Act, 2002, obliges the Commission for Communications Regulation (“ComReg”) to produce, publish and maintain the national Radio Frequency Plan, detailing all radio frequency allocations in Ireland. The last complete revision took place in 2014, with lesser revisions taking place in the interim, reflecting all of the relevant amendments and updates, on both a national and international level, applicable to Ireland.

In publishing the Radio Frequency Plan for Ireland, ComReg is maintaining its commitment to all stakeholders, ensuring that a comprehensive source of information is made available, providing key data on current and potential radio spectrum allocations in Ireland.

ComReg welcomes any proposed amendments or changes in relation to the Radio Frequency Plan, and a comment form is included at the end of the document for your convenience.

This document contains the Radio Frequency Plan for Ireland as revised on 03 May 2017. In combination with using this document, users are advised to refer to the ComReg website⁴ for further updates to the Plan.

The document is divided into ten sections. The tables of frequency allocations are contained within three of these sections. Section 3 contains the frequency plan for the 9 kHz to 27 500 kHz band. Section 4 contains the frequency plan for the 27.5 MHz – 10 000 MHz band. Section 5 contains the frequency plan for the 10 GHz – 1000 GHz band, followed by Annexes to the document.

For each frequency band, the types of radio services that are permitted for operation in Ireland and those radio services that are currently in use in that band are detailed. In addition, the International Telecommunications Union (ITU)⁵ Allocations applicable to Ireland and the associated European Common Allocation (from ERC Report 025⁶) for each frequency band are outlined, along with applicable national and European legislation, relevant European Decisions and Recommendations and ComReg documentation.

It should be noted that this Table of Frequency Allocations will be regularly updated to facilitate the introduction of new radio services and to remove allocations for radio services that have been phased out. Amendments are made to align the document with any new international agreements reached on spectrum utilisation e.g. at World Radiocommunication Conferences (WRCs) of the ITU, within CEPT or the European Union.

Explanations

- Column 1:** Values in this column denote the radio frequency band. Units used in the column header are: kHz indicates kilohertz, MHz indicates Megahertz and GHz indicates Gigahertz.
- Column 2:** This column shows the type of service allocated to the band by the ITU, e.g. (FIXED, MOBILE). These allocations are defined in the ITU Radio Regulations. Entries in UPPER CASE denote primary services while entries in lower case denote secondary services as defined in the Radio Regulations. Footnotes (e.g. 5.149) are the footnotes to the Table of Frequency Allocations as detailed in the Radio Regulations. Only footnotes relevant to Ireland are included in this table, the full text of which appears in Chapter 3 Annex 1.
- Column 3:** This column indicates the European Common Allocation for the band according to ERC Report 025. ERC Report 025 represents the strategic objective of CEPT to achieve a harmonised table of frequency allocations and utilisations in Europe. Entries in UPPER CASE denote primary services while entries in lower case denote secondary services as defined in the Radio Regulations.
- Column 4:** This column indicates the current national usage and associated allocation where applicable, for the frequency band in Ireland.
- Column 5:** This column details the national and European Legislation applicable to the frequency band.
- Column 6:** This column details the relevant CEPT Decisions and Recommendations applicable to the frequency band.
- Column 7:** This column gives relevant document references as well as other additional information applicable to the frequency band.

Below is an example only and does not necessarily reflect the accurate situation for this frequency band which is given in the detailed tables of this publication.

| Frequency Band (MHz) | ITU Allocation and Footnotes applicable to Ireland | European Common Allocation | National Usage | National and European Legislation | Relevant CEPT Decisions and Recommendations | Notes | |

Column 1

Column 2

Column 3

Column 4

Column 5

Column 6

Column 7

The first column indicates the frequency band as the spectrum from 402 -403 MHz.

The second column indicates that the ITU have allocated this band to five services, namely to Metrological aids, Earth-Exploration Satellite service and, meteorological satellite, the Fixed service and the Mobile service but excluding the aeronautical mobile service. The allocations to Metrological aids, Earth-Exploration Satellite service and the meteorological satellite services are on a primary basis, as indicated by the use of UPPER CASE letters. The allocations to the Fixed service and the Mobile except aeronautical mobile service are on a secondary basis. Secondary services shall not cause interference to primary services, nor shall they claim protection from harmful interference from primary services but they can claim protection from other stations of the same of other secondary services to which frequencies are assigned at a later date.

Where a footnote appears on the same line as a service this indicates that the footnote is directly applicable to the service that it shares a line with. Generic footnotes (e.g. EU2) appear in a separate rows to the listed radio services as they are not directly applicable to them.

ITU Footnotes e.g. 5.92 (not relevant to this example) mentioned in the tables below may be found in Chapter 3 Annex 1 of this document while European Footnotes may be found in Chapter 3 Annex 2:

The third column indicates the European Common Allocation for the frequency band as outlined in ERC Report 0252.

The fourth column indicates the national usage for the frequency band. In Ireland the band 402 - 403 MHz is used by meteorological aids and Short Range Devices.

The fifth column details the relevant national and European legislation. In Ireland Primary legislation is in the form of Acts and secondary legislation is in the form of Statutory Instruments (S.I.).

The sixth column details any relevant CEPT Decisions or Recommendations applicable to the frequency band. These references are available to download from <http://www.ecodocdb.dk>.

The seventh column contains relevant notes and references such as:

- Relevant ComReg documents which can be downloaded from www.comreg.ie.
- Applicable sections of the ITU Radio Regulations e.g. Appendix 16 of Radio Regulations (not relevant to this example).
- Applicable regional frequency plans e.g. ITU Stockholm 1961 plan (not relevant to this example).

Tá áthas orm an t-ochtú heagrán den Phlean Minicíochta Raidió a chur faoi bhur mbráid. Is acmhainn náisiúnta luachmhar teoranta ach riachtanach í Speictream Minicíochta Raidió (“Speictream”) a chuireann €4.6 billiún le holltáirgeacht intíre (OTI) na hÉireann¹. Is é an Coimisiún um Rialáil Cumarsáide (ComReg) atá freagrach as bainistíocht a dhéanamh ar na riachtanais chasta speictrim, riachtanais atá ag dul i ndeacracht, chun tacú le príomhthionscail agus príomhgheallsealbhóirí ar nós iad siúd in earnálacha na Craoltóireachta, na bhFórsaí Cosanta, Oideachais, na Seirbhísí Éigeandála, Teileachumarsáide, Iompair gan ach cuid acu a lua. Tá méadú suntasach tagtha ar an méid sonraí atá in úsáid ó tháinig fóin chliste ar an saol, méadú atá níos airde ná 500% ó 2012¹, rud atá eascaithe ag feabhsuithe i gcur i bhfeidhm na ngréasán nua 3G agus 4G. Is cuid ríthábhachtach í úsáid gléasanna gan sreang, ar nós fón cliste agus táibléad, in éascú a dhéanamh ar rochtain leathanbhanda gan sreang ar an idirlíon chun riachtanais go leor úsáideoirí a shásamh. Chomh maith le sin, tacaíonn Speictream le forbairtí ar nós Idirlíon na nÉarraí, méadraithe cliste agus gréasán soghluaiste 5G atá romhainn. Go deimhin, bíonn Test and Trial Ireland de chuid ComReg ag éascú le taighde a dhéanamh ar go leor de na feidhmchláir seo.

Déanann an t-eagrán seo cur síos ar chuid de na leasuithe suntasacha a tugadh isteach ag an gComhdháil Domhanda ar Radchumarsáid de chuid an ITU¹ in 2015 (WRC-15). Tá na nuashonrúcháin riachtanacha go léir ar reachtaíocht náisiúnta agus Eorpach chomh maith le cinntí agus moltaí ábhartha CEPT¹ san áireamh chomh maith.

Tá sé riachtanach mar sin go mbeidh eolas atá soiléir, iomlán agus cruinn ar an Speictream á chur ar fáil do na geallsealbhóirí go léir. Thairis sin, leagann alt 35 den tAcht Cumarsáide, 2002, dualgas ar ComReg an Plean Minicíochta Raidió náisiúnta a chruthú, a fhoilsiú agus a choinneáil, ina ndéantar an leithdháileadh minicíochta raidió go léir in Éirinn a shonrú. Rinneadh an t-athbheithniú iomlán deireanach i 2014, agus rinneadh athbheithnithe níos lú idir an dá linn a léiríonn na leasuithe agus na nuashonrúcháin ábhartha go léir go náisiúnta agus go hidirnáisiúnta a bhaineann le hÉirinn.

Agus an Plean Minicíochta Raidió d’Éirinn a fhoilsiú, tá ComReg ag leanúint lena thiomantas do na geallsealbhóirí go léir, agus é ag cinntiú go gcuirtear foinse chuimsitheach eolais ar fáil, agus é ag soláthar príomhshonraí ar leithdháileadh reatha agus féideartha speictream raidió in Éirinn.

Cuireann ComReg fáilte roimh leasuithe nó athruithe molta ar bith i dtaobh an Phlean Minicíochta d’Éirinn. Tá foirm do thráchtanna iniata ag deireadh na cáipéise ar mhaithe le do chaoithiúlacht.

Aibreán 2017

Tá an Plean Minicíochta Raidió d'Éirinn sa doiciméad seo, mar a bhí athmheasta ar 29 Samhain 2013. In éineacht leis an doiciméad seo a úsáid, moltar d'úsáideoirí féachaint ar shuíomh gréasáin an Choimisiúin⁴ chun nuashonrúcháin bhreise a dhéantar ar an bPlean a fháil.

Tá an doiciméad roinnte i ndeich rannán. Tá na táblaí leithdháilte minicíochta i dtrí cinn de na rannáin seo. Tá an plean minicíochta don bhanda ó 9 kHz go 27500 KHz i Rannán 3. Tá an plean minicíochta don bhanda ó 27.5 MHz – 10 000 MHz i Rannán 4. Tá an plean minicíochta don bhanda ó 10 GHz - 1000 GHz i Rannán 5, agus aguisíní an doiciméid ina dhiaidh sin.

Maidir le gach banda minicíochta, sonraítear na cineálacha seirbhísí raidió atá ceadaithe a bheith á n-oibriú in Éirinn agus na seirbhísí raidió sin atá in úsáid faoi láthair sa bhanda sin. Chomh maith leis sin déantar cur síos ar Leithdháileadh an Aontais Idirnáisiúnta Teileachumarsáide (AIT)⁵ ar Éirinn agus ar an Leithdháileadh gaolmhar Comónta Eorpach (ó Thuarascáil ERC 025⁶) maidir le gach banda minicíochta, in éineacht le reachtaíocht náisiúnta agus Eorpach is infheidhme, cinntí agus moltaí bainteacha Eorpacha agus doiciméid an Choimisiúin um Rialáil Cumarsáide.

Ba chóir duit a thabhairt do d'aire go ndéanfar nuashonrú rialta ar an Tábla Leithdháilte Minicíochta seo ar mhaithe le tabhairt isteach seirbhísí nua raidió a éascú agus chun leithdháileadh seirbhísí raidió a bhfuil deireadh curtha leo a bhaint. Déanfar leasú chomh maith chun an doiciméad a chur i gcomhréir le comhaontuithe nua idirnáisiúnta ar bith a bhainfear amach ar úsáid speictrim m.sh. ag Comhdhálacha Domhanda Radachumarsáide (CDRanna) den AIT nó i CERPT nó san Aontas Eorpach.

Colún 6

Colún 7

Tugann an chéad cholún le fios gurb ionann an banda minicíochta agus an speictream ó 402-403 MHz.

Tugann an dara colún le fios go bhfuil an banda seo leithdháilte ag an AIT ar chúig sheirbhís, mar atá, áiseanna meitéareolaíoch, seirbhís Satailíte Taiscéalaíochta Domhain, satailít mheitéareolaíoch, an tseirbhís sheasta agus an tseirbhís shoghluaiste, gan an tseirbhís aerloingseoireachta shoghluaiste san áireamh. Tá an leithdháileadh ar áiseanna meitéareolaíoch, seirbhís satailíte Taiscéalaíochta Domhain agus na seirbhísí satailíte meitéareolaíoch a dhéanamh ar bhonn príomha, mar atá léirithe trí úsáid na gCEANNLITREACHA. Tá an leithdháileadh ar an tseirbhís sheasta agus ar an tseirbhís shoghluaiste á dhéanamh ar bhonn tánaisteach, ach amháin i gcás na seirbhíse aerloingseoireachta shoghluaiste. Ní chuirfidh seirbhísí tánaisteacha isteach ar sheirbhísí príomha, agus ní éileoidh siad cosaint ar chur isteach díobhálach ó sheirbhísí príomha, ach tá cead acu cosaint a éileamh ar stáisiúin eile den chineál céanna atá ina seirbhísí tánaisteacha eile a leithdháiltear minicíochtaí orthu ina dhiaidh sin.

Nuair a bhíonn fonóta le feiceáil ar an líne chéanna le seirbhís, tugann sé seo le fios go bhfuil an fonóta bainteach go díreach leis an tseirbhís a bhfuil sé ar aon líne léi. Bíonn fonótaí cineálacha (m.sh. EU2) le feiceáil ar rónna éagsúla leis na seirbhísí raidió liostaithe, ós rud é nach mbaineann siad leo go díreach.

Is féidir teacht ar Fhonótaí an AIT m.sh. 5.92 (nach bhfuil bainteach leis an sampla seo) atá luaite sna táblaí thíos, i gCaibidil 3, Aguisín 1 den doiciméad seo, fad is gur féidir teacht ar Fhonótaí Eorpacha i gCaibidil 3 Aguisín 2:

Luann an tríú colún an Leithdháileadh Comónta Eorpach le haghaidh an bhanda mhinicíochta mar atá mínithe i dTuarascáil ERC 0252.

Luann an ceathrú colún úsáid náisiúnta an bhanda minicíochta. Bíonn an banda ó 402 - 403 MHz in Éirinn á úsáid ag áiseanna meitéareolaíoch agus ag Gléasanna Gearr-Raoin.

Sonraíonn an cúigiú colún an reachtaíocht bhainteach náisiúnta agus Eorpach. Is ionann reachtaíocht phríomha in Éirinn agus achtanna, agus is ionann reachtaíocht thánaisteach agus Ionstraimí Reachtúla (I.R.)

Sonraíonn an séú colún cinntí nó moltaí bainteacha ar bith de CERPT a bhaineann leis an mbanda minicíochta. Is féidir na tagairtí seo a íoslódáil ó <http://www.ecodocdb.dk>.

Tá nótaí agus tagairtí bainteacha sa seachtú colún, amhail:

- Doiciméid bhainteacha an Choimisiúin, agus iad ar fáil le híoslódáil ó www.comreg.ie.
- Rannáin is infheidhme de Rialacháin Raidió an AIT m.sh. Aguisín 16 de na Rialacháin Raidió (ní bhaineann siad seo leis an sampla seo).
- Pleananna minicíochta réigiúnacha is infheidhme e.g. Plean an AIT i Stócólm in 1961 (ní bhaineann sé seo leis an sampla seo).

Tá an t-eolas atá sa doiciméad seo curtha ar fáil ag an gCoimisiún um Rialáil Cumarsáide agus é mar thuiscint gur chun críocha eolais amháin atá sé. Níl sé beartaithe a bheith mar bhonn le cinneadh infheistíochta ar bith, agus níor chóir breathnú air mar mholadh ó na Coimisinéirí nó óna gcomhairleoirí páirt a ghlacadh i dtairiscint ar bith le haghaidh leithdháileadh speictream raidió.

ANNEX 1

RELEVANT FOOTNOTES FROM RADIO REGULATIONS.

Reference is made in the Table of allocations to the following footnotes. These footnotes are taken from Article 5 of the Radio Regulations, as amended at WRC-12. Additional information can be obtained from the ITU (see Annex 5).

-
- 5.53** Administrations authorizing the use of frequencies below 8.3 kHz shall ensure that no harmful interference is caused thereby to the services to which the bands above 8.3 kHz are allocated.
-
- 5.54** Administrations conducting scientific research using frequencies below 8.3 kHz are urged to advise other administrations that may be concerned in order that such research may be afforded all practicable protection from harmful interference.
-
- 5.54A** Use of the 8.3-11.3 kHz frequency band by stations in the meteorological aids service is limited to passive use only. In the band 9-11.3 kHz, meteorological aids stations shall not claim protection from stations of the radionavigation service submitted for notification to the Bureau prior to 1 January 2013. For sharing between stations of the meteorological aids service and stations in the radionavigation service submitted for notification after this date, the most recent version of Recommendation ITUR RS.1881 should be applied. (WRC12)
-

)

5.56 The stations of services to which the bands 14-19.95 kHz and 20.05-70 kHz and in Region 1 also the bands 72-84 kHz and 86-90 kHz are allocated may transmit standard frequency and time signals. Such stations shall be afforded protection from harmful interference. In Armenia, Azerbaijan, Belarus, Bulgaria, the Russian Federation, Georgia, Kazakhstan, Mongolia, Kyrgyzstan, Slovakia, Tajikistan and Turkmenistan, the frequencies 25 kHz and 50 kHz will be used for this purpose under the same conditions. (WRC-07)

5.57 The use of the bands 14-19.95 kHz, 20.05-70 kHz and 70-90 kHz (72-84 kHz and 86-90 kHz in Region 1) by the Maritime mobile service is limited to coast radiotelegraph stations (A1A and F1B only).

Exceptionally, the use of class J2B or J7B emissions is authorized subject to the necessary bandwidth not exceeding that normally used for class A1A or F1B emissions in the band concerned.

5.60 In the bands 70-90 kHz (70-86 kHz in Region 1) and 110-130 kHz (112-130 kHz in Region 1), pulsed radionavigation systems may be used on condition that they do not cause harmful interference to other services to which these bands are allocated.

5.62 Administrations which operate stations in the radionavigation service in the band 90-110 kHz are urged to coordinate technical and operating characteristics in such a way as to avoid harmful interference to the services provided by these stations.

5.64 Only classes A1A or F1B, A2C, A3C, F1C or F3C emissions are authorized for stations of the fixed service in the bands allocated to this service between 90 kHz and 160 kHz (148.5 kHz in Region 1) and for stations of the Maritime mobile service in the bands allocated to this service between 110 kHz and 160

kHz (148.5 kHz in Region 1). Exceptionally, class J2B or J7B emissions are also authorized in the bands between 110 kHz and 160 kHz (148.5 kHz in Region 1) for stations of the Maritime mobile service.

5.67A Stations in the amateur service using frequencies in the band 135.7-137.8 kHz shall not exceed a maximum radiated power of 1 W (e.i.r.p.) and shall not cause harmful interference to stations of the radionavigation service operating in countries listed in No. 5.67. (WRC-07)

5.73 The band 285-325 kHz (283.5-325 kHz in Region 1) in the Maritime radionavigation service may be used to transmit supplementary navigational information using narrow-band techniques, on condition that no harmful interference is caused to radiobeacon stations operating in the radionavigation service. (WRC-97)

)

5.74 *Additional Allocation:* in Region 1, the frequency band 285.3-285.7 kHz is also allocated to the Maritime radionavigation service (other than radiobeacons) on a primary basis.

)

5.76 The frequency 410 kHz is designated for radio direction-finding in the Maritime radionavigation service. The other radionavigation services to which the band 405-415 kHz is allocated shall not cause harmful interference to radio direction-finding in the band 406.5-413.5 kHz.

5.79 The use of the bands 415-495 kHz and 505-526.5 kHz (505-510 kHz in Region 2) by the Maritime mobile service is limited to radiotelegraphy.

5.79A When establishing coast stations in the NAVTEX service on the frequencies 490 kHz, 518 kHz and 4 209.5 kHz, administrations are strongly recommended to coordinate the operating characteristics in accordance with the procedures of the International Maritime Organization (IMO) (see Resolution 339 (Rev.WRC07)). (WRC07)

5.535 In the band 24.75-25.25 GHz, feeder links to stations of the broadcasting-satellite service shall have priority over other uses in the Fixed-satellite service (Earth-to-space). Such other uses shall protect and shall not claim protection from existing and future operating feeder-link networks to such broadcasting satellite stations.

5.535A The use of the band 29.1-29.5 GHz (Earth-to-space) by the Fixed-satellite service is limited to geostationary-satellite systems and feeder links to non-geostationary-satellite systems in the Mobile-satellite service. Such use is subject to the application of the provisions of No. **9.11A**, but not subject to the provisions of No. **22.2**, except as indicated in Nos. **5.523C** and **5.523E** where such use is not subject to the provisions of No. **9.11A** and shall continue to be subject to Articles **9** (except No. **9.11A**) and **11** procedures, and to the provisions of No. **22.2**. (WRC-97)

5.536 Use of the 25.25-27.5 GHz band by the inter-satellite service is limited to space research and Earth exploration-satellite applications, and also transmissions of data originating from industrial and medical activities in space.

5.536A Administrations operating earth stations in the Earth exploration-satellite service or the space research

service shall not claim protection from stations in the fixed and mobile services operated by other administrations. In addition, earth stations in the Earth exploration-satellite service or in the space research service should be operated taking into account the most recent version of Recommendation ITU-R SA.1862. (WRC-12)

People's Rep. of Korea, Slovakia, the Czech Rep., Romania, the United Kingdom, Singapore, Sweden, Switzerland, Tanzania, Turkey, Viet Nam and Zimbabwe, earth stations operating in the Earth exploration-satellite service in the band 25.5-27 GHz shall not claim protection from, or constrain the use and deployment of, stations of the fixed and mobile services. (WRC-15)

5.537 Space services using non-geostationary satellites operating in the inter-satellite service in the band 27-27.5 GHz are exempt from the provisions of No. **22.2**.

5.538 *Additional allocation:* the bands 27.500-27.501 GHz and 29.999-30.000 GHz are also allocated to the fixed-satellite service (space-to-Earth) on a primary basis for the beacon transmissions intended for up-link power control. Such space-to-Earth transmissions shall not exceed an equivalent isotropically radiated power (e.i.r.p.) of +10 dBW in the direction of adjacent satellites on the geostationary-satellite orbit. (WRC-07)

5.539 The band 27.5-30 GHz may be used by the fixed-satellite service (Earth-to-space) for the provision of feeder links for the broadcasting-satellite service.

5.540 *Additional allocation:* the band 27.501-29.999 GHz is also allocated to the fixed-satellite service (space-to-Earth) on a secondary basis for beacon transmissions intended for up-link power control.

5.541 In the band 28.5-30 GHz, the earth exploration-satellite service is limited to the transfer of data between stations and not to the primary collection of information by means of active or passive sensors.

5.541A Feeder links of non-geostationary networks in the mobile-satellite service and geostationary networks in the fixed-satellite service operating in the band 29.1-29.5 GHz (Earth-to-space) shall employ uplink adaptive power control or other methods of fade compensation, such that the earth station transmissions shall be conducted at the power level required to meet the desired link performance while reducing the level of mutual interference between both networks. These methods shall apply to networks for which Appendix 4 coordination information is considered as having been received by the Bureau after 17 May 1996 and until they are changed by a future competent world radiocommunication conference. Administrations submitting Appendix 4 information for coordination before this date are encouraged to utilize these techniques to the extent practicable. (WRC-2000)

5.543 The band 29.95-30 GHz may be used for space-to-space links in the Earth exploration-satellite service for telemetry, tracking, and control purposes, on a secondary basis.

5.544 In the band 31-31.3 GHz the power flux-density limits specified in Article 21, Table 21-4 shall apply to the space research service.

5.545 *Different category of service:* in Armenia, Georgia, Kyrgyzstan, Tajikistan and Turkmenistan, the allocation of the band 31-31.3 GHz to the space research service is on a primary basis (see No. 5.33). (WRC12)

Administrations should take this into account when considering regulatory provisions in relation to these bands. Because of the potential deployment of high-density applications in the fixed-satellite service in the bands 39.5-40 GHz and 40.5-42 GHz (see No. 5.516B), administrations should further take into account potential constraints to high-density applications in the fixed service, as appropriate. (WRC-07)

5.547A Administrations should take practical measures to

minimize the potential interference between stations in the fixed service and airborne stations in the radionavigation service in the 31.8-33.4 GHz band, taking into account the operational needs of the airborne radar systems. (WRC-2000)

5.547C *Alternative allocation:* in the United States, the band 32-32.3 GHz is allocated to the radionavigation and space research (deep space) (space-to-Earth) services on a primary basis. (WRC-03)

These efpd values shall be evaluated using the methodology given in Recommendation ITU-R S.1586-1 and the reference antenna pattern and the maximum gain of an antenna in the radio astronomy service given in Recommendation ITU-R RA.1631-0 and shall apply over the whole sky and for elevation angles higher than the minimum operating angle Θ_{min} of the radiotelescope (for which a default value of 5° should be adopted in the absence of notified information).

These values shall apply at any radio astronomy station that either:

– was in operation prior to 5 July 2003 and has been notified to the Bureau before 4 January 2004; or

– was notified before the date of receipt of the complete Appendix 4 information for coordination or notification, as appropriate, for the space station to which the limits apply.

Other radio astronomy stations notified after these dates may seek an agreement with administrations that have authorized the space stations. In Region 2, Resolution 743 (WRC-03) shall apply. The limits in this footnote may be exceeded at the site of a radio astronomy station of any country whose administration so agreed. (WRC-15)

5.551I The power flux-density in the band 42.5-43.5 GHz produced by any geostationary space station in the Fixed-satellite service (space-to-Earth), or the
