## **Revised Amendments to ComReg Document 13/118R, “Radio Frequency Plan for Ireland”.**

### **General**

It should be noted that the Radio Frequency Plan for Ireland is regularly updated to facilitate the introduction of new radio services and to remove allocations for radio services that have been phased out. Amendments are also made to align the document to any new international agreements reached on spectrum utilisation (e.g., at World Radiocommunication Conferences ("WRC"s) of the International Telecommunication Union (the "ITU"), or within the European Conference of Postal and Telecommunications Administrations ("CEPT ") or the European Union ("EU").

Since updating the Radio Frequency Plan (ComReg Document 13/118R) in July 2014, there have been a number of new and amended National Regulations and European Decisions which have been implemented within Ireland. As such the Commission for Communications Regulation ("ComReg"), has updated the Radio Frequency Plan to reflect these changes, as outlined below.
